

FAA

Please be advised...

Pacific Park has a No Drone policy as regulated by the Federal Aviation Administration. Please see regulations below for further guidance.

Regulations Prohibiting Model Aircraft and Drones

WARNING: Operating any Model Aircraft or Drone on or around the Santa Monica Beach, including the Santa Monica Pier, is **STRICTLY PROHIBITED BY FAA REGULATIONS.**

As defined by the Federal Aviation Administration (FAA) model aircrafts and drones are deemed as aircraft and subject to FAA oversight and enforcement. According to Advisory Circular 91-57, Model Aircraft Operating Standards (June 9, 1981) operation of these types of aircrafts is to be restricted over populated areas.

The Reform Act of 2012 Section 336 states that when these devices are flown within five miles of an airport the operator of the aircraft must provide the airport operator and the airport air traffic control tower prior notice to operation. The Santa Monica Pier is within the five mile perimeter of the Santa Monica Airport.

In addition, CFR 91.119 states operations are not to be conducted "closer than 500 feet to any person, vessel, vehicle, or structure." Disregard for this will result in enforcement actions. Included in CFR 91.13 through 91.15 is the prohibition of any aircraft being operated recklessly or carelessly in populated areas.

Pacific Park thanks you for your compliance to these regulations.
